THE ROLE OF "EMOTIONAL INTELLIGENCE" THEORY IN FINE ARTS TEACHING METHODOLOGY

Emil Ağayev

Abstract: It is important to have emotional thoughts in the students who react to the works of art presented in the teaching methodology of the fine art subject. According to Daniel Goleman, a person has two intelligences: emotional and rational intelligence. One of the most important intelligences in art is the correct expression of emotions. Thinking or expressing an independent opinion about any painting leads to the swelling of feelings, including emotional thinking. At this time, the student should give a correct opinion on the presented artists' works, correctly analyze his own and other people's feelings, and arrive at an exhausted opinion. Emotional and rational intelligence are closely related.

Keywords: Artificial Intelligence, Personalized Marketing, Predictive Analytics, Ethical AI.

Address: Teacher of the subject combination commission "Art and physical education" of the Azerbaijan State Pedagogical College under the Azerbaijan State Pedagogical University
